

**All Keys Lost Cable suitable for Toyota\*  
ADC2016 - Code D755976AD**

May 2023

**Enables programming of replacement Toyota\* 'H' bladed keys even in an all keys lost situation.**

**What does the cable do?**

The ADC2016 All Keys Lost Cable is designed to extract key data from the vehicle immobiliser box, this data is then used in conjunction with ADC2015 key emulator to produce a temporary master key. It is not necessary to remove the vehicle immobiliser box from the vehicle, the ADC2016 cable simply connects to the 12v feed & ignition feed of the immobiliser box via the vehicle fuse box, along with a single connection to the vehicle K Switch (Key Warning Switch) located on the side of the vehicle ignition barrel.

**What else is needed?**

Smart Pro

ADC2015  
Emulator cable

ADS2328 Programming  
Software

Connection locations specific to each model can be found on MYKEYS Pro under "Guided processes"
