

ALUMINIUM INTERFOLD HINGE

Code No. A 124

APPLICATION

- Suitable for aluminium entrance doors in high usage situation
- Suitable for either centre pocket or front edge glazing systems.
- Suitable for some timber door applications.
- Pre-drilling of the holes in the timber may be required.

SPECIFICATION

- **Alloy:** High strength T.6 minimum tensile 254 mpa.
- **Pin Dia:** 6mm 304 Stainless Steel with machined chamfer both ends.
- **Bushes:** Flanged nylon.
- **Knuckle:** Squareline - Heavy Duty
- **Aluminium Endcaps:** Pressed-in interference fit.
- **Maximum Weight Capacity:** 20 kg (turn over for further information)

INSTALLATION GUIDE ONLY

- **Door thickness: Minimum 35mm.**
- When using a door closer, we recommend a minimum of 3 hinges be used, with the top hinge located as high as possible. For excessive usage, a fourth hinge may be required.
- Standard Door: 2040 (H) x 820 (W)
- Locator allows for fast fixing.

FIXING

- **Fastening screws supplied.**
- Locator allows for Fast-Fixing.

FINISH

- SNA - Satin Natural Anodised
- Black - Black Powder Coat
- White - White Powder Coat

OLD CODE NO.

- A104 SF

Code No. A 124

INTERFOLD HINGE INFORMATION

Standard Application:

- The top hinge is 127mm down from the frame mark to top of the hinge.
- Bottom hinge 254mm from bottom edge of barrel to finished floor.
- The third hinge is centered between the top and bottom hinges (if more than three hinges used, hinge spacings are equal between all hinges from the top to the bottom hinges). See Example Door A.
- Hinge is to be mounted directly onto the door and frame as it is a surface mount application. There will be a gap between the frame and the door edge equal to the thickness of the hinge leaf. This will also be equal to the gap above the door.
- Space out and mark all holes for pre-drilling before attaching the hinges to the frame.
- Please note if the hinge is 'Offset' - where the barrel sits to one side of the hinge leaf. This will result in misalignments when hanging.

Pre-drill and Mount

With Door Closer:

- If you are using a door closer, you will need to add an extra hinge on top of the advised chart.
- The spacing between the top two hinges should be the same as the length of the hinge.
- The first hinge should be as close (high) as possible to the door closer. The second should then be spaced equal to the hinge size (length) down the door. All subsequent hinges should be evenly spaced thereafter between the second and bottom hinge. See Example Door B.

Closed Door Top View

Hinge Specific Information:

- Minimum Door Thickness: 35mm
- Up to 2100 x 820 x 20kg - 3 Hinges
- Please refer to the table below for more sizes.

Mounted View

Number of Hinges Required per Door Size

	820 (W)
2100 mm (H)	3
2300 mm (H)	4
2500 mm (H)	5
