25 YEARS OF THE LSC WEBSITE

1998 ↗

2022 ↖

Cast your mind back to the 1990's (for those of us old enough to have been alive) and business was done by telephone or fax. LSC's fax machine used to run day and night with customers sending hand-written orders to us.

Little did we know that technology would soon be dead, replaced by the Internet and the World Wide Web.

Generally speaking, the Internet is the concept of connected computers and servers, using network protocols – a network – to communicate with each other. The WWW is the collection of millions of web pages and 'sites', offering content over the Internet.

According to Wikipedia: Tim Berners-Lee invented the World Wide Web while working at CERN in 1989. . . . using several concepts . . . He developed the first web server, the first web browser, and a document formatting protocol, called Hypertext Markup Language (HTML). Tim's "Mosaic" browser became the core of the first commercially popular browser "Netscape Navigator".

Prior to the late 1980's, the "internet" was a closed network, available to universities, government and military use only. Websites for the general public first appeared during the 1990's.

LSC was 'online' with our www.lsc.com.au domain from this time, and we had a couple of email addresses, but no "web page" as such.

We launched the first LSC Webpage in early 1998.

On one hand it was basic and certainly "ugly" by today's standards, but on another hand it was advanced. We had contact and product information and a technical support page! You could download demonstration versions of DOS programs such as the Silca Key Programs and Getkey. We had an interactive map where you could find our contact information.

2005

2012

↗ Check out web.archive.org

Thanks to the wonders of the "Internet Archive", you can see what it looked like here, you can download our newsletter of the time – where you could go in the draw to win a VCR (Video Cassette Recorder – for those of you who are too young to have used that technology).

Today, our website is modern, works across browsers and different types of device, allows you to obtain technical details on 1000's of products and to log in, check pricing and stock, and to place orders. You can research vehicles via CarLab or learn new skills via TechED. You can still read the newsletter, and can check your account, view upcoming events, download catalogues, and get in touch.

NEW SOUTH AUSTRALIAN BRANCH

LSC SA IS ON THE MOVE!

Come say Hello!

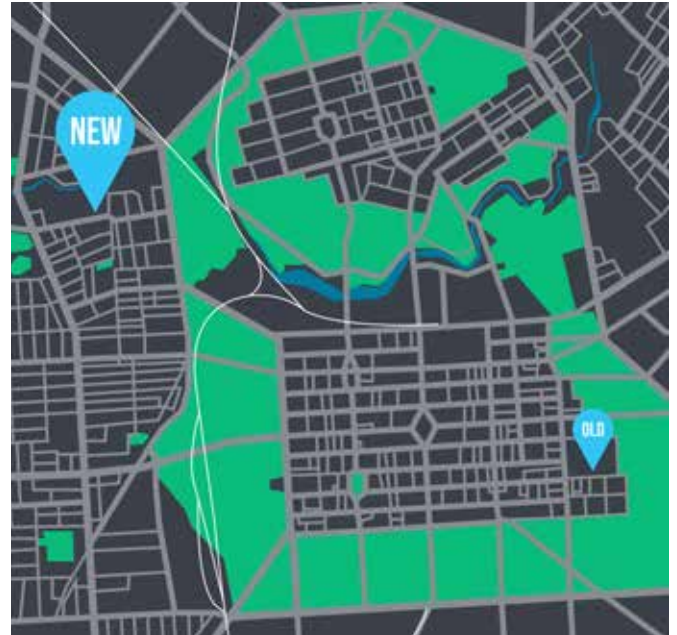

The LSC Branch is moving from the Halifax Street location to the popular inner west Thebarton precinct. This modern and new branch can be found at 5 West Thebarton Road, Thebarton.

Only 15 minutes away from our previous location, our new SA Branch will be fitted out with a more convenient layout, large spacious showroom, trade counter and modern interior.

We have plenty of on-site parking, offering closer and more convenient access to the trade counter. No more driving around the block looking for a park!

Located in close proximity to the CBD we will be ready and waiting to provide you quality service and solutions from Monday to Friday 8am – 4-30pm. – starting Tuesday 7th February

We look forward to showing you our new Branch and sharing with you our exciting plans for the future.

WHERE

333 Halifax Street Adelaide to
5 West Thebarton Road, Thebarton

SMART PRO MERCEDES SOLUTION

This addition to SMART Pro & Advanced Diagnostics is a fast, reliable and safe method of adding keys to many Mercedes models, 1996 – 2014.

The start-up kit comprises of a new SMART Programmer (ADC260) and 3 high quality Silca IR keys. The programming procedure is as easy as connecting the ADC260 to the SMART Pro and vehicle, then following the SMART Pro on screen prompts.

SMART Pro MERCEDES[®] SOLUTION

ADA SMART PRO MERCEDES KIT (Including SMART Programmer and 3 keys)

Features:

- Working key required
- Internet connection required
- No token required
- FREE password calculation
- Programming licence auto activates on SMART Pro when SMART Programmer connected
- Keys available separately (SHU106S23)
- Replacement blades available separately (SHU106T)

SD755333ZB

A COMPLETE KIT FOR YOUR AUTOMOTIVE REMOTE NEEDS

NEW FROM LSC

We make it easy to get set up to cover more automotive flip keys than anyone else.

Featuring a range of Silca's Italian made, premium quality blades, supplied in quantities to match the popularity of vehicles on the road, get yourself covered with nearly 40 different blades and 4 shapes of remote.

In this kit you'll find 10 pieces of blade for cars like Toyota, Ford, Hyundai and Mitsubishi, 5 pieces to suit VW and Audi, and then single pieces to suit more exotic brands like Peugeot or Fiat.

Supplied in a stackable, interlocking, modular and expandable kit this is the best way to get maximum coverage easily.

Easily slip open older style Master lock padlocks

GTT190

PREMIER REFERENCE FOR AUTOMOTIVE LOCKSMITHS

CarLab continues to be the premier reference source of information for automotive locksmiths. Over 600 professional transponder key businesses currently benefit from its use.

In the last 2 months alone the team in TSU have made in excess of 200 edits and or additions across most vehicle manufacturers in the database.

CarLab also provides updates on Smart Pro developments. There are a number of forms in CarLab to assist customers which include a Smart Pro Feedback Form and Technical Support Inquiry Form.

Available as a recurring or once-off subscription

TOYOTA PROXIMITY SOLUTION FROM ADVANCED DIAGNOSTICS

NEW

SMART Pro™

This major new release from Advanced Diagnostics now gives SMART Pro users the ability to program keys to select Toyota and Lexus proximity vehicles when all keys lost. The solution also makes possible key programming to vehicles which would normally require dealer security (TIS) access, such as the very popular Corolla and RAV4 2018+. Component removal and or plugging into ECUs is not required. The key programming process is safe and very user friendly with all programming carried out via the OBD connector. The solution consists of 2 parts as listed.

ADA Smart Pro Emulator for Toyota DST when All Keys Lost

- Used for when all proximity keys are lost
- Connects to the SMART Pro by way of USB
- Key data read from the vehicle by the SMART Pro is stored in the emulator
- The emulator becomes a master key
- Using the emulator the operator can program new proximity fobs to the vehicle

SD755650AD

New software programs proximity keys to select Toyota vehicles.

ADA SMART PRO Software Toyota 2022 ADS2328

- When all proximity keys are lost the use of the ADC2015 emulator is required
- If there is an existing proximity key the software will program spare keys
- Bypasses the requirement for dealer security access (TIS) where applicable
- Token usage differs depending on vehicle specifics (refer CarLab, MYKEYSPRO or updated Smart pro)
- Category A software which can be purchased outright if required

SD756605AD

For additional information inclusive of applications lists please refer to MYKEYSPRO, CARLAB or the menu in an up-to-date Smart Pro device. **At the time of release the ADC2015 covers select DST128 proximity fobs only, with further coverage to follow**. The functionality of the emulator extends to other manufacturers such as late Subaru utilising 'H' bladed keys. But these are not yet present in our region.

YOUR TRUSTED AUSTRALIAN BRANDS

Lockwood is the leading brand in the Australian locking industry. With a well-established reputation for high quality products, this iconic brand provides a wide range of locking solutions to residential housing, commercial building and industrial application markets.

ADI was founded in the mid 1970s by Locksmiths to meet the needs of Locksmiths. The inventors found that specialised locking products didn't exist, so they went about creating them.

Established in 1951, **K.J.Ross Security Locks** started out from humble beginnings to quickly grow to become Australia's most respected name in security products.

Established in 1987 **CS Technologies** is an Australian owned, leader in designing and manufacturing solutions for the building access control and security market.

Kevron is an Australian company specialising in the manufacture and supply of identification products for keys, fobs, credentials and even your pet or your wine!

Established in the late 1980s, **D&D Technologies** is a company dedicated to the design and manufacture of top-quality, state-of-the-art gate hardware products.

Telkee Key Cabinets is Australia's #1 Key Management Solution. For over 70 years they have manufactured commercial quality lockable key management systems in Sydney, Australia.

Lock Focus has been at the forefront of lock mechanism innovation in Australia since 1972. They continue to manufacture the majority of their products in Australia, making Lock Focus one of the last lock manufacturers in the country.

Founded in 1917, **Sutton Tools** remains an Australian family business that is renowned for its high-quality power tool accessories and cutting tools for the hardware market and a wide range of specialised industrial applications.

Austral Lock is the Australian market leader of premium door and window hardware, providing locking solutions for windows, security screen doors (hinged or sliding) and sliding patio doors (aluminium or timber).

LOCKWOOD NERO® COLLECTION

The Lockwood Nero® Collection provides a sensuous quality that complements contemporary decor; adding a defining design element to any space. The collection features a selection of popular Lockwood residential and semi-commercial products in an elegant matt black finish.

DAHUA FULL-COLOUR ANALOGUE KITS

NEW

Utilise amazing Power-over-Coax (PoC) to power, stream, record and configure a system, all with existing coaxial cabling.

These PoC kits are designed to be a cost-effective analogue upgrade solution for users, as well as a quick-and-easy install for technicians. Because PoC cameras use the existing coaxial cabling, installers can simply plug-in the new cameras and XVR. It's that simple! Users can instantly enjoy high-definition, full colour digital images.

Both kits feature Dahua's popular Full Colour technology, for clear 24 hour colour video surveillance, as well as Smart Motion Detection Plus, to power human and vehicle detection and reduce false alarms. For high risk installations, we recommend upgrading to the more advanced kit which includes two TiOC Active Deterrence cameras.

Full-Colour

- Industry-leading smart dual illuminators technology expands the range of full-colour product's application scenarios.
- Switches between white light mode and IR mode based on target detection status, which helps reduce light pollution.
- Links with Perimeter Protection and SMD Plus of AI XVR, accurately detecting real targets and filtering out false alarms.
- Full-colour monitoring in white light mode effectively captures vivid colour information and clear details of human/vehicle targets.
- One-tap switching of various illumination modes through the DMSS app provides users with flexible configuration.

TiOC Active Deterrence

- Intelligent Voice Alarm; with built-in 1+4 alarm audio, users can choose the corresponding audio according to different scenarios.
- Customized Alarm Ringtone; the alarm sound of the camera can be customized and uploaded via the DMSS APP, bringing more flexibility for users.
- One-click Arming & Disarming; with this function, users can freely choose not to be disturbed by APP or platform when the event notification is disabled

EVENT PREVIEW 2023 SAVE THESE DATES!

After a successful year of events in 2022, we're delighted to be returning to several of 2023's major Security events. This year we're excited to roll out new stands, bigger prize draws, and as always, plenty of awesome giveaways!

Keep up to date with these 2023 events below; we can't wait to see you there!

The SecTech Roadshow

2nd May: Brisbane
4th May: Sydney
9th May: Melbourne
11th May: Adelaide
16th May: Perth

The Security Exhibition & Conference

30th August - 1st September: Sydney

MLAA National Conference & Trade Expo

27th - 28th October: Cairns

HAPPY CUSTOMERS

A1 LOCKSMITHS (WA)

A1 Locksmiths have added another Silca machine to their arsenal with the purchase of the Silca Triax Pro, proudly welcomed by Jaxon Correia.

ECHUCA LOCKSMITHS (VIC)

Col is all smiles as his LSC Account Manager delivered this new Silca Unocode F900 just before Christmas.

LIGHTNING LOCK & KEY (WA)

Dylan Fox from Lightning Lock & Key is more than happy to pose with his New Silca Futura Edge!

MAPPAS ARCHITECTURAL (QLD)

Jim Mappas from Mappas Architectural was all smiles as he visited our Brisbane branch to pick up his new Silca Futura Edge.

NORTH EAST LOCKSMITHS (VIC)

Wayne added the Silca Triax Pro to his workshop and we captured the moment with this great pic.

SMART CHOICE LOCKSMITHS (QLD)

Alex Cheras was happy to pose next to his new addition to the work van – the Silca Futura Edge.

SILCA: FUTURA EDGE PLUS

The Futura Edge Plus features a unique tilting cutting head unit that allows the machine to cut and decode Medeco Biaxial keys, in addition to regular flat inline household and automotive keys.

Built on the familiar and widely used Futura platform, the new machine is unique in being able to decode Medeco Biaxial keys via the laser reader that's used to decode regular household and automotive keys.

The machine comes with a unique clamp to securely hold Medeco Biaxial keys, and is electronically controlled via tablet. Smart connectivity allows you to keep the machine updated via Wifi or ethernet connection.

SD8A5069ZB

Features:

- Upgrade your Medeco key cutting solution
- Safe, easy, guided process via tablet and integrated software
- Unique jaw allows Medeco keys to be cut and decoded
- Unique tilting cutter head operates in 3 positions
- Cut regular inline key and Medeco on one machine
- Carbide cutter for extremely long life

Jump onto www.lsc.com.au and check out the videos of the machine in action
