SALTO Smart Access in Schools

NEW BRAVA Metro in Black

PROTECTOR Euro Mortice Locks

Security Tech Germany

## AUSTRALIA'S MOST TRUSTED COMMERCIAL PADLOCK

With the largest range of options & accessories available, custom etching or embossing & Australian Standard Certified it's no wonder the ABUS 83/45 & 83/50 are the locksmiths' padlock of choice. The AS4145.4 2002 standard applies to padlocks used in conjunction with padlock fittings. Requirements that relate to;

- **PHYSICAL SECURITY** is classified under 10 levels, based on performance tests that simulate attack. The security rating is based on the lowest test result achieved.
- **CORROSION RESISTANCE** is classified under 5 levels, based on standard accelerated corrosion tests.

### ABUS 83/45

**Physical Security  
Rating SP6**

**Corrosion Resistance  
Rating C4**

### ABUS 83/50

**Physical Security  
Rating SP6**

**Corrosion Resistance  
Rating C4**

Your customers can rest easy knowing their ABUS 83/45 and 83/50 padlocks are Australian Standard Certified, as requested by many commercial insurers & Government Depts. Just another reason why ABUS is the locksmiths' padlock of choice.

Tested and Australian Standard Certified AS4145.4 2002

# NEW SILCA WEBSITE

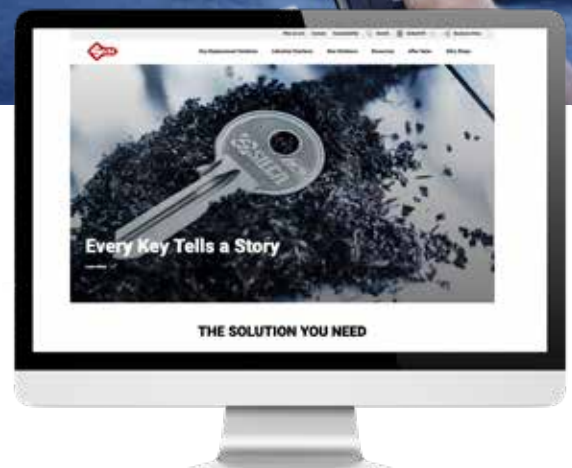

We're excited to remind you about Silca's new website: [www.silca.biz](http://www.silca.biz)

*Check out the new site online now!*

The new site is fresh, easy to navigate and has a rich trove of information about all of Silca's product segments including machinery, keys, automotive solutions and software.

For keys, complete catalogues can be downloaded. For automotive, detailed instructions about remote keys, prox keys and transponders can be downloaded. For machinery, you can find the optional accessories guides and other information.

For mobile users, MyKeysPro remains the easiest way to search and find all information about Silca products, but desktop users may prefer a traditional website.

# LOCK FOCUS RV ESSENTIALS

The demographic of Australia's ageing population means the RV and Caravan industry is expected to continue growing at a fast pace in 2024 and beyond. The Lock Focus single key expanding range of products gives opportunities for locksmiths to engage with new customers and provide a simple single key solution.

*Lock Focus RV single key range, expanding your opportunities*

## Meeting Educational Demands: SALTO Smart Access Control in Schools

Schools in Australia face numerous security challenges, such as protecting students and staff from intruders, managing access to different areas and facilities, and ensuring compliance with safety regulations. These challenges require a comprehensive and flexible security management solution that can adapt to the changing needs and demands of the educational environment.

As schools now demand cutting-edge technological solutions over traditional keys, SALTO Smart Access Control emerges as the premier choice for locksmiths and security integrators committed to fortifying school environments. Here's a breakdown of why SALTO is the preferred solution:

### 01 Security Evolution: Transitioning Beyond Traditional Keys

SALTO Systems allows schools to bring smarts to every door, creating a truly mobile and secure campus from the perimeter to the interior. SALTO Systems can create access zones and schedules for different areas, doors and users, ensuring that only authorised people can enter sensitive or restricted spaces. SALTO Systems also enables schools to monitor and track access events in real-time, alerting them to any unauthorized or suspicious activity. In case of an emergency, SALTO Systems can also lock or unlock doors remotely, facilitating evacuation or lockdown procedures.

### 02 Reduced cost and complexity: SALTO Systems eliminates the need for keys, cards, or wires

SALTO Systems reduces the costs and disturbances associated with traditional access control systems. Installation and maintenance of the locks is simplified, as they are battery-powered and communicate wirelessly with the software.

SALTO Systems also integrates seamlessly with other systems, such as CCTV, fire alarms, or attendance management, creating a unified and efficient security platform. This allows schools to leverage their prior investments in security technology, making the transition to SALTO a practical and efficient choice.

### 03 Improved convenience and user experience

SALTO Systems has a range of credentials, including the ability to use mobile devices. Cards can often become multi-purpose, such as for staff and student ID and printing. SALTO Systems also provides a user-friendly interface for managing and updating access rights, allowing schools to grant or revoke permissions in seconds. SALTO Systems also enhances the aesthetics and design of the doors, as the locks are sleek and discreet.

### 04 Cost-Effective Solutions for Long-Term Savings

As schools shift towards advanced access control, SALTO's wireless technology provides a cost-effective solution. The flexibility and durability of the system means that schools will have made a future-proof and long-lasting investment that will pay for itself over time.

### 05 User-Friendly Technology for Educational Settings

Recognising the importance of user-friendly technology in educational settings, SALTO offers intuitive interfaces and mobile compatibility. This ensures that both administrators and end users can efficiently operate the system. The user-centric approach enhances security measures without causing disruptions to the daily activities of the school.

### 06 Rapid Response in Emergency Situations

In emergency situations, rapid response is paramount. SALTO Smart Access Control facilitates quick lockdowns and immediate response actions. This critical feature enhances the safety of students, faculty, and staff during unforeseen circumstances.

The advantages of installing SALTO Smart Access Control in schools align with the evolving demands of educational institutions. As guardians of school security, locksmiths and security integrators have the opportunity to meet these demands head-on by leveraging SALTO's benefits. By embracing this robust, adaptable, and technologically advanced solution, security installers play a crucial role in creating safer schools tailored to the modern security landscape.

The market leader, SALTO is installed in over 800 schools across Australia and New Zealand. Scan the QR codes above to hear how SALTO has revolutionised the management of safety and security at Yarrabilba State Secondary College in Queensland as well as Trinity Grammar School in Victoria.

For more information, scan the QRs or visit [saltosystems.com/en-au/industries/education-solution](https://saltosystems.com/en-au/industries/education-solution).

# YOUR TRUSTED AUSTRALIAN BRANDS

**Lockwood** is the leading brand in the Australian locking industry. With a well-established reputation for high quality products, this iconic brand provides a wide range of locking solutions to residential housing, commercial building and industrial application markets.

**ADI** was founded in the mid 1970s by Locksmiths to meet the needs of Locksmiths. The inventors found that specialised locking products didn't exist, so they went about creating them.

Established in 1951, **K.J.Ross Security Locks** started out from humble beginnings to quickly grow to become Australia's most respected name in security products.

CS TECHNOLOGIES

Established in 1987 **CS Technologies** is an Australian owned, leader in designing and manufacturing solutions for the building access control and security market.

**Kevron** is an Australian company specialising in the manufacture and supply of identification products for keys, fobs, credentials and even your pet or your wine!

Established in the late 1980s, **D&D Technologies** is a company dedicated to the design and manufacture of top-quality, state-of-the-art gate hardware products.

**Austral Lock** is the Australian market leader of premium door and window hardware, providing locking solutions for windows, security screen doors (hinged or sliding) and sliding patio doors (aluminium or timber).

LOCKFOCUS

**Lock Focus** has been at the forefront of lock mechanism innovation in Australia since 1972. They continue to manufacture the majority of their products in Australia, making Lock Focus one of the last lock manufacturers in the country.

Founded in 1917, **Sutton Tools** remains an Australian family business that is renowned for its high-quality power tool accessories and cutting tools for the hardware market and a wide range of specialised industrial applications.

**Telkee Key Cabinets** is Australia's #1 Key Management Solution. For over 70 years they have manufactured commercial quality lockable key management systems in Sydney, Australia.

## Ride the Tide WITH dormakaba

You might remember back in November and December we were running our 'Ride The Tide With dormakaba' promotion, giving away 5 amazing stand up paddleboard's from Queensland-based company - Ride The Tide.

Each of the 5 winning SUP prizes are valued at a whopping \$990ea, with each winner set to receive 1 x SUP, 1 x adjustable carbon paddle and 1 x carry bag. Ride The Tide are Australian pioneers in making classic timber Paddle Boards.

The promotion stipulated that everyone who spent \$500 (ex.GST) on dormakaba mortice locks & mortice lock kits between the 1st November and 31st of December would earn 1 entry into the running to win, there was no limit on the number of entries per customer.

We're pleased to announce that our 5 SUP prize pack winners are:

- QLD – Ross, Allcoast Locksmiths
- NSW – Mark, Chapman Locksmiths
- SA – Paul, Northside Locksmiths
- WA – Cameron, Capital locksmith and Security
- VIC – Andrew, Lockmart Frankston

Congratulations to all of our winners, and thank you to everyone who entered this giveaway!

# SILCA TRIAX PRO NEW FIRMWARE

## *New firmware for Triax Pro enhances OEM Key cutting for hard keys*

Silca have released new cards for the Triax Pro machines which enhance the cutting performance on OEM automotive keys from popular brands including Kia, Hyundai, Toyota and Lexus.

The original versions of these keys are made from very hard nickel silver, and the new cards instruct the machine to take multiple passes at the key, reducing cutter wear and improving the quality of the finished key.

Cards 5460, 5461, 5462, 5463 and 5464 apply. Look for the notation of "Original Key" in the description. The SKP-Pro is also updated to reflect these new cards.

Upgrade your machine to Version 31.5.0.64 or higher now to take advantage of the new cards.
