RISCO's powerful hybrid security panel

Borg Locks are the market leader in innovative design and manufacture of high quality mechanical push button access control. With their latest "Easicode Pro" series a hit with Locksmiths and end users.

The range was designed to eliminate traditional code changing issues by being able to change the code on the door in seconds. No tools needed, no need to remove the lock from the door, just by using the change key and in seconds the code is changed

STREAMLINE YOUR BUSINESS WITH PM8

Simple, easy to read on-screen instructions for the mobile user

The latest development for ProMaster Master-Keying 8 users is now available, and the best part is that it's FREE*

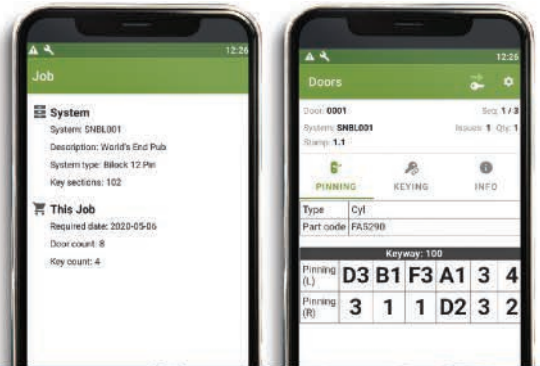

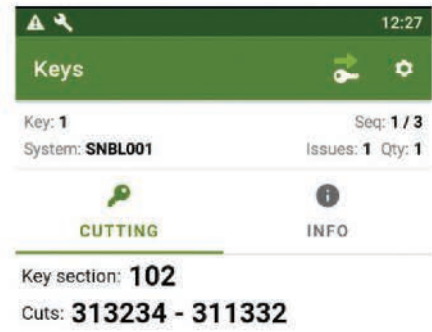

WH Software securely pairs a unique mobile to your business via a secured web server, and pinning and key codes are transmitted in an encrypted form between your base and the mobile device.

Pair up to three mobile devices per PM8 user, and control how long the information is available on the phone for, giving you control, peace of mind and security. No additional hardware or software is needed, internet access is all that is required. All system types are supported.

* Free functionality is available while your maintenance agreement remains current.

Features:

- Takes only a minute to configure it
- Highly secured encrypted data communication
- Send key cuts & pinning to a mobile device
- Set a time limit for device security
- Supports all design modules
- Supports up to 3 mobile devices per ProMaster 8 user license
- New administrator options to control who can send jobs to mobile
- No additional hardware needed, just use your existing internet connection
- Available in Basic, Premium and manufacturer editions

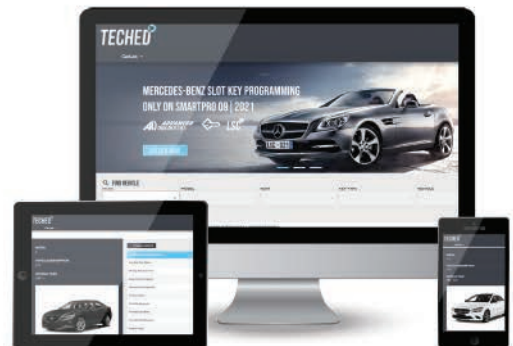

PREMIER REFERENCE FOR AUTOMOTIVE LOCKSMITHS

CarLab continues to be the premier reference source of information for automotive locksmiths. Over 600 professional transponder key businesses currently benefit from its use.

In the last 2 months alone the team in TSU have made in excess of 200 edits and or additions across most vehicle manufacturers in the database.

CarLab also provides updates on SMART Pro developments. There are a number of forms in CarLab to assist customers which include a SMART Pro Feedback Form and Technical Support Inquiry Form.

Available in 3 and 12 month recurring and nonrecurring formats. CarLab is a must have for the automotive transponder programming professional.

DYNAMIC SECURITY & DATA CABLE COMPLIANCE TESTED TO MEET AUSTRALIAN STANDARDS

Dynamic Cable Solutions range of security and data cable is new to LSC and has been manufactured and compliance tested to meet Australian standards.

The cable is 100% copper and features count down meter marking to ensure you know how much cable is left in your box. 1 - 10 individual markings on the sheath assist with easy cable identification. All boxed cable is fitted on a plastic easy pull reel to make your job run smoother.

Cable Solutions

ADI IS TOUGH

ADI has been a part of the locksmith and security world for many years, with a reputation for being simple, well designed, reliable and most of all strong. Great care is taken to ensure the strength of the product, particularly the locking pin or bolt.

The locking pins for the 5004, SL5 and block locks are made and hardened locally, here in Australia. We use two different processes for the pins. 444 Block Lock Pins are made from high grade 41/40 steel – its super tough to begin with, and is then through-hardened to a Rockwell rating of 60.

A wide range of extended pins are available, and stainless steel pins are available for applications where extreme corrosion resistance is required.

TECH TIP SMART PRO MENU

**ADVANCED
DIAGNOSTICS**
SMART Pro™

The SMART Pro menu has 17 geographical regions listed. These regions can be filtered as required by the end user. It is recommended that Australia only is selected. This declutters and streamlines the vehicle model listing for our region only. Importantly the Australian vehicle menu listings have been designed by LSC, so the highest degree of accuracy is maintained.

Select region in the Settings Menu to lock the region.

Select, add or remove region in the Vehicle Manufacturer section for the current session only

SMART KEYGARAGE™

THE SMARTEST KEY HAND OVER

NEW

Access and share your keys the smart way with ABUS's new Smart Bluetooth KeyGarage.

The new ABUS Smart Bluetooth® KeyGarage is a great way to safely store and share your keys and other valuables. The large internal space means you can easily store house keys, car keys, prox cards and fobs in the one convenient compartment.

The Smart KeyGarage can provide fast and easy access for guests in holiday rentals, trades, workers, cleaners, care services and more.

Users can manage & use the KeyGarage by downloading the free ABUS HomeTec Pro app for iOS or Android. As an administrator, you can generate a six-digit key code or electronic access ticket via the app to give access to whatever is stored in the KeyGarage. You can schedule timed and future access.

For additional security, you can monitor who accesses the KeyGarage with notifications as well as an audit trail all through the app.

KG787BTSHKL

Large, sturdy metal housing

Illuminated electronic keypad for entering a 6-digit key code

Manage and use the KeyGarage™ using the HomeTec Pro Bluetooth app

Generate and send individual access tickets or a 6-digit code for multiple users

View the log access history and current users

Capacity for up to 20 keys, 3 car keys or 30 plastic cards

Integrated key hooks for hanging up keys/key fobs

Automatic locking

Battery compartment for 2 x AA batteries, accessible from the outside

The KeyGarage uses secure AES-128-Bit encryption

Recommended installation of the KeyGarage on the wall in a protected outdoor area. IP54 rated.

TAGGY KEYS OPEN, TAG, CLOSE

THE FIRST KEY DESIGNED FOR USERS TO TAG THEMSELVES, AND THE FIRST KEY INCORPORATING A KEY TAG.

Available in five colours, in three popular profiles, Silca Taggy keys allow a customer to 'tag' their key such that there's no confusion about what it opens. Suitable for home, shed, gate, garage, holiday-home, padlocks, office, cupboards – the list goes on and on.

Remove keyring clutter and save time, no more guesswork. Order similar coloured taggy keys for groups of locks, or choose different colours to stand out.

Ideal for users who struggle with smaller key heads, the Taggy key features a large head which the user 'snaps' the tag into. End-users are always on the lookout for additional identification methods for keys, and Taggy Keys fits that bill perfectly.

Made in Italy, with Silca's usual high-quality attention to detail. The plastic 'snaps' solidly into place, and is a special grade used in the eyewear industry.

Features:

- Three Profiles - LW4, LW5 and TE2X
- Five Tag Colours
- Sold in a packet of 10
- Pre-assembled to ensure small parts aren't misplaced

visit lsc.com.au to see Silca Taggy Keys full range!

An integrated IP module reliable and continuous communication, and integrated Wi-Fi module allows wire-free installation.

New USB Type-C Input

With a fast USB TYPE-C input, and laptop can be connected with a standard cable allowing quick and simple system setup and update.

NEWS AND EVENTS

2022 MLAA BRANCH MEETINGS

MELBOURNE | WESTSIDE ALE WORKS
Wednesday 2 March | 6:00 – 9:00PM

With more than 20 beers on tap and American-style pizza made fresh to order, it's a great way to start off your autumn.

SYDNEY | WILLIE THE BOATMAN
Wednesday 9 March | 5:30 – 8:00PM

A local craft brewery in the inner west, enjoy beer tastings in a warehouse-style space.

These events are free for MLAA members, so stop by for a drink and a bite to eat, and share some stories from the trenches with your colleagues.

MILESIGHT COLLABORATION PARTNER OF THE YEAR 2021

LSC has now been a distribution partner with Milesight for 1 ½ years. Despite some ongoing challenges we have experienced since launching the product to the Australian market (Pandemic, component shortages, global logistics), the Milesight brand has continued to grow and is now the preferred CCTV system for many security businesses throughout the country.

During the last 18 months, the LSC team have done an incredible job in promoting the Milesight brand and this hard work and commitment has paid off with LSC being named Milesight Collaboration Partner of the Year 2021. It is always a great honour to be acknowledged by our partners for our ongoing commitment to the brands, but we must also remember that if it wasn't for the continued support from our valued customers, these awards would not be possible.

Milesight and LSC are very excited about 2022 and the next stage in our strong partnership.

SPONSORSHIP

ABUS AND LSC ONGOING SPONSORSHIP WITH LUCKY STACE RACING

In Collaboration with ABUS Security Tech Germany, LSC are incredibly proud to be an ongoing sponsor of Lucky Stace Racing, and she has started the year off at high-speed yet again!

After a challenging 2021 season that involved a serious crash in March, Stace has showed that her resilience is second to none. All while collecting plenty of silverware, an extensive bike rebuild, alongside plenty of rehab, recovery and rest has held Stace in good stead for the 2022 season.

To rebuild confidence in her bike and the track, Stace returned to the location of the crash on the 10th of January to undertake a day of private coaching with industry pros. During this session, Stace almost equalled her pre-crash lap-time of 1.17.

With many state and national travel restrictions still hanging-over the 2022 calendar, Stace got in early to have a practice race day at Phillip Island on the 24th of January. Many Australian Superbike racers had the same idea, making the day very competitive and super-fast!

Only two months after her crash in 2021, Stace had set her fastest ever time of 1.47.567 in Phillip Island, with a top speed of 263kph. She hoped to replicate those speeds and spoke to some of the best in the business for racing tips.

Former MotoGP & WSBK Racer, & Three-time FIM Superstock 1000 Champion: Bryan Staring, World SuperSport Racer & Australian Superbike rider: Oli Bayliss, and Australian Superbike Champion, 2008 AMA Supermoto champion & Moto X games silver medallist: Troy Herfoss were of great help.

Despite heavy track-day traffic and an interrupted 2021 season, Stace came out flying with a higher top speed of 264kph and finished only 2 seconds behind her fastest ever time! Wrapped up in Fast ABUS Red, times like these point to a big 2022 season ahead!

To keep up to date with ABUS's Racing you can follow Stace here on:

-  @luckystaceracing
-  facebook.com/LuckyStace
-  Lucky Stace Racing
