## ABUS Touch™ 57/50 & 57/45

Enjoy the quick and convenient way of opening the ABUS Touch™ padlock with just your finger. The ABUS Touch™ 57/50 and ABUS Touch™ 57/45 with a smaller dia shackle (6.5mm) are great for securing personal items or sharing access with your family, all without a key. Great for personal lockers, toolboxes, cabinets or even letterboxes.

- CR2 battery included
- Encrypted memory
- Double ball locking for higher security
- Coated Nano Protect™ shackle \* Coated body
- Automatic opening by spring-loaded shackle
- Suitable for indoor or outdoor use (IP66 & IP68)
- Two admins and up to 20 users can be registered
- Efficient energy usage gives up to 10,000 openings

# THE MARKET LEADER

BORG Locks are the market leader in innovative design and manufacture of high-quality mechanical push button access control.

The BORG ECP range is designed to eliminate traditional code changing issues by being able to change the code on the door in seconds.

*Did you know?*

Each BORG ECP lock comes with blocking pins, if installed it disables the on-door code change feature. Also, the BORG 5000 Series ECP locks come with a separate blocking pin to deactivate the passage function.

# LIGHTSYS+ 32 DOOR ACCESS CONTROL

The new LightSYS+ from RISCO is already packed full of features but soon these features will be enhanced even more with the release of Door Access Control.

Using the newly developed RISCO Prox reader, which is connected to the RISCO Bus, users will be able to control up to 32 doors. The readers will be automatically assigned to the panel according to the serial number on BUS (no dip switches) making connection and setup seamless.

Users will be able to arm and disarm the system using an RFID tag. 3 badge arming allows the User to Arm a partition by presenting an RFID Tag card at a reader three times within a short period of time and disarming the system by presenting an RFID Tag once to open the door and Disarm the specific Partition.

**Other functions in the new Door Access control feature include:**

- Defining the user output from the output list
- Door Control Time - defines the time between when the user passes the proximity tag on the reader till the doors locks again. Enter the Pulse time (in second) to define door opening time
- Door Open Too Long (DOTL)
- Door Control Schedules

# ABUS 83/45 FLEXIBLE SHACKLE

NEW

## A SECURE & FUNCTIONAL CABLE SOLUTION

Increase the functionality of your ABUS 83/45 or 83AL/45 series padlocks with the NEW Flexible Cable Shackle. Increase the flexibility of Australia's most trusted commercial padlock by simply replacing the shackle of any ABUS 83/45 or 83AL/45 with the new Cable Flexible Shackle. Great for securing items that require a little more flexibility than a rigid shackle.

8345CABFLEXC

2024  
100 YEARS  
ABUS  
FAMILY

## From our family company to yours: Happy **100th** ABUS

Reaching the 100-year milestone is an incredible achievement. The statistics show that more than 45% of companies fail within 5 years. Fewer than 25% make it past 15 years. The 100-year club is a small and exclusive one.

'Security'. This steadfast mindset has guided the company through multiple generations, and continues to be the ongoing commitment today, exemplifying enduring success.

To reach the 100-year mark shows commitment to a singular purpose, and takes the clear focus and drive of the owners over many generations. For ABUS, that focus is always on 'The Good Feeling of

We're proud to have been partners with you for 25 years. When we launched the rekeyable interchangeable core and now iconic 83 series padlock in 1999 we could never have imagined the impact it would make on our market.

100

LOVE IT?  
LOCK IT

PRECISION  
GERMAN  
ENGINEERING

Today, the product portfolio we offer from ABUS is incredibly diverse, and includes a host of high quality, innovative and reliable products that customers can bank on to support their business.

That the same family owns and operates the original company 100 years after the founders started it is no small achievement – and it's something to be incredibly proud of.

We join you in celebrating the pinnacle of family business success, and sincerely thank you for your commitment to our market, the security of our customers' customers, and the enduring friendship and partnership we've enjoyed over the past 25 years.

Take a bow ABUS: **Happy 100 years.**

## Meeting Educational Demands: SALTO Smart Access Control in Schools

Schools in Australia face numerous security challenges, such as protecting students and staff from intruders, managing access to different areas and facilities, and ensuring compliance with safety regulations. These challenges require a comprehensive and flexible security management solution that can adapt to the changing needs and demands of the educational environment.

As schools now demand cutting-edge technological solutions over traditional keys, SALTO Smart Access Control emerges as the premier choice for locksmiths and security integrators committed to fortifying school environments.

→ For more information, scan the QRs or visit [salto.com/en-au/industries/education-solution](https://salto.com/en-au/industries/education-solution).

The advantages of installing SALTO Smart Access Control in schools align with the evolving demands of educational institutions. As guardians of school security, locksmiths and security integrators have the opportunity to meet these demands head-on by leveraging SALTO's benefits. By embracing this robust, adaptable, and technologically advanced solution, security installers play a crucial role in creating safer schools tailored to the modern security landscape.

The market leader, SALTO is installed in over 800 schools across Australia and New Zealand. Scan the QR codes above to hear how SALTO has revolutionised the management of safety and security at Yarrabilba State Secondary College in Queensland as well as Trinity Grammar School in Victoria.
