ABUS HIGH SECURITY STEEL PADLOCKS

SEEPL CERTIFICATION - 83 SERIES

PRECISION
GERMAN
ENGINEERING

When that high security job or Government installation requires high security padlocks, it's time to use an ABUS 83 series solid hardened steel body version. The models below are SEEPL Certified for use in Australian Government facilities.

- 83/55, 83/60 & 83/80 SCEC approved, for SL rating please check model
- Easily converted from snap shut to key captive function
- Removable cylinder assembly for quick rekeying
- Incorporates the popular 570 style barrel
- Chrome plated hardened steel lock body
- Double ball locking
- Special hardened alloy steel shackle with Nano-Protect™ as standard
- Compatible with most restricted keying profiles
- Wide range of shackles in different sizes
- 83/55 versions available for etching
- Wide range of accessories and spare parts are also available

ABUS 83/55 SERIES
SECURITY LEVEL 3 (SL3)

ABUS 83/60 SERIES
SECURITY LEVEL 3 (SL3)

ABUS 83/80 SERIES
SECURITY LEVEL 4 (SL4)

Must have SCEC approved keying system installed and be key retained.
When a keying system with a lower SL rating is used, the padlock inherits the lower SL rating.

For more information on the full range of ABUS hardened steel body padlocks please visit lsc.com.au

ADA SMART PRO BYPASS CABLE FOR RENAULT

The Renault® Bypass Cable allows for direct connection to the vehicle's Body Control Module (BCM) and in doing so bypasses the secure gateway module. The two 40 pin connectors, male and female, plug directly into the BCM.

The two 16 pin connectors are used to connect the SMART Pro to the vehicle OBD if power is needed. Applicable to proximity key programming on later models.

SD755649AD

AVAILABLE NOW

RISCO LIGHTSYS+ DOOR ACCESS CONTROL

Using the newly developed RISCO Prox reader, which is connected to the RISCO Bus, users will be able to control up to 32 doors. The readers will be automatically assigned to the panel according to the serial number on BUS (no dip switches) making connection and setup seamless.

Users will be able to arm and disarm the system using an RFID tag. 3 badge arming allows the User to Arm a partition by presenting an RFID Tag card at a reader three times within a short period of time and disarming the system by presenting an RFID Tag once to open the door and Disarm the specific Partition.

SMART PRO MERCEDES SOLUTION

This addition to SMART Pro & Advanced Diagnostics is a fast, reliable and safe method of adding keys to many Mercedes models, 1996 – 2014.

The start-up kit comprises of a new SMART Programmer (ADC260) and 3 high quality Silca IR keys. The programming procedure is as easy connecting the ADC260 to the SMART Pro and vehicle, then following the SMART Pro on screen prompts.

ADA SMART PRO MERCEDES KIT (Including SMART Programmer and 3 keys)

Features:

- Working key required
- Internet connection required
- No token required
- FREE password calculation
- Programming licence auto activates on SMART Pro when SMART Programmer connected

SMART Pro MERCEDES[®] SOLUTION

A COMPLETE KIT FOR YOUR AUTOMOTIVE REMOTE NEEDS

NEW FROM LSC

We make it easy to get set up to cover more automotive flip keys than anyone else.

Featuring a range of Silca's Italian made, premium quality blades, supplied in quantities to match the popularity of vehicles on the road, get yourself covered with nearly 40 different blades and 4 shapes of remote.

In this kit you'll find 10 pieces of blade for cars like Toyota, Ford, Hyundai and Mitsubishi, 5 pieces to suit VW and Audi, and then single pieces to suit more exotic brands like Peugeot or Fiat.

Supplied in a stackable, interlocking, modular and expandable kit this is the best way to get maximum coverage easily.

SRKIT001

VOLKSWAGEN AUDI GROUP

SMART PRO UPDATE

SMART Pro

- More vehicles
- Improved automatic PIN read
- Easier to use
- More reliable

A considerable amount of development work has gone into the SMART Pro for the purpose of enhancing and extending key programming for the Volkswagen Group.

Historically, the Volkswagen Group has been considered one of the most challenging group of vehicles for key programming. To some extent that is still the case, in particular where Audi is concerned. The challenges arise from the impossibility of accessing any security information from the dealer network, a multitude of engine ECU and dash cluster variants requiring different key programming methodologies together with PIN reading and transponder precoding demands. These challenges have required the technician to invest in multiple programming tools in order to achieve reasonable key programming coverage.

The SMART Pro software for programming TP2.0 platform vehicles (2003-2010) has now been totally redesigned with extended coverage for

- PIN Code reading from dash cluster or Engine ECU
- Component security (CS) 7th byte calculation
- Transponder preparation with Component Security (CS) by way of the ADC242 SMART Aerial

Most engine ECU variants are supported with exception of a small number of Siemens and Bosch EDC17.

Yet another enhancement has been made to the UDS platform vehicles 2010 – 2020 (excluding MQB). Coverage of the UDS platform extends to

- UDS KESSY Proximity systems
- Bladed systems

All keys lost is managed by way of dash removal and utilising the ADC219 dash cluster reset cable.

Pleasingly, these VW Group updates have been developed by an Advanced Diagnostics engineer here in Australia working closely with LSC.

Please refer to the SMART Pro Development notes in LSC CarLab, the menu in an up to date SMART Pro tool or MYKEYSPRO for a comprehensive and most importantly an accurate Applications List.

PUT YOUR NAME ON IT

MAKE YOUR BRAND STAND OUT

WITH LSC'S CUSTOMISATION OFFERING

Put your business name and/or logo on keys, padlocks, cylinders, tags, cards & fobs with LSC.

Everybody knows advertising works, and you can't have too much of it. The only thing better than advertising is repeat advertising, so why not take advantage of LSC's repeat advertising service via our embossing, engraving, printing or laser etched product offer.

Embossed or laser etched padlocks (in your corporate colour scheme if you want) get your name on every gate, fence or entrance they're attached to. When your customers need to find your phone number or website, they just have to look at their keyring, padlock or cylinder.

ABUS OVAL & RIM CYLINDERS Maximise your exposure with ABUS

Get your name in front of your customer every time they use their lock with laser etching on oval and round rim cylinders from ABUS.

Have your business name and details etched onto solid brass, high quality precision ABUS cylinders.

Talk to your account manager to obtain a sample or place an order.

EMBOSSED ABUS 83AL SERIES Show off your colours

ABUS 83AL series padlocks are now available embossed and paint-filled.

- 10 body colours to choose from
- 6 infill colours to choose from
- Match your identity
- Match end-users identity
- Light yet strong
- Compatible with all popular inline LW5 keyways and with most restricted key systems

SILCA COINED KEYS Get your business name out there

Advertise your business for free with LSC's fast and professional coining service. Every time your customers use their keys, they've got your details on hand.

- Made in Italy
- Free advertising
- Quality controlled coining
- Made from premium quality brass
- Promote your business
- Fastest coining turnaround

Our personalisation service is fast, we offer assistance to get your graphics right, and we take the time and care to present your corporate image in a quality way that reflects your business in the best light.

THE AUSTRALIAN TAG TEAM
A tag for every application

Keep your business in the fore front of your customers mind with Kevron Printed Tags

Have your business name and or logo printed on every ID5 tag you sell. Australian Made with a quick turn-around Kevron Custom printed tags are a must for your business.

LSC offers a first-class printing and programming service for credentials with a same day dispatch on any stocked product ordered before midday. We have invested in enterprise quality printing machines to provide you the fast service you need.

MLAA EVENT REVIEW

RISCO

On the 8th of June we were privileged to host the Master Locksmiths Association of Australasia (MLAA) Victorian Branch Meeting at our Distribution & Training Centre.

Despite being a typically cold Melbourne winter's night, the event had a sensational turnout. The crowd thoroughly enjoyed our disposable hand-warmers and the gas heaters scattered throughout the event.

The event's featured product was the Italian-made Silca Unocode F-Series; and we carried this distinct Italian theme throughout the evening. Guests were treated to a range of woodfired pizzas, prosecco and the ever-popular local option, beer.

In addition to the Silca Unocode F-Series, the LSC team hosted several live product displays, including:

- The process of coining keys.
- Our Car-in-box models, used for transponder key programming training.
- The latest in electronic security from SALTO, HID, RISCO & Milesight.
- The newest range of products from ABUS.

Members made the most of the numerous giveaways on offer, from umbrellas to T-shirts, mugs and drink bottles; there was something for everyone.

Thanks to all those who attended. We can't wait to see you next time!

NEWS AND EVENTS

"People buy from the brands they trust"

Trust is an emotion that fuels our decision whether we are conscious of it or not. It is that intangible quality that signals reliability and integrity. Whether it is a product or service, trust is what reassures us that we are making the right choice.

Cost, quality and desirability are all important factors for consumers. While brands come in and out of vogue, those that capture our attention, maintain our confidence and win over our trust do so by holding fast to their core principles.

Our new Trusted Brands Program aims to shine a spotlight on brands that have won the trust of Australian consumers. Trust is central to any manufacturer of security products, and is generally achieved through years of delivering robust, high performing products.

The MCAA National Conference & Trade Expo is back for 2022, and we invite you to join us on the Gold Coast at the JW Marriott Resort & Spa.

This year's conference program includes a full trade expo, a terrific keynote from Nelson Mandela's former bodyguard Rob Redenbach, several interactive Q&A style industry forums, and a mix of skills training and product information sessions.

This is the locksmith industry's premier event for 2022, and we encourage all locksmiths and security technicians to attend the event.

HAPPY CUSTOMERS

INDEPENDENT LOCKSMITHS (NSW)

Zach Winslade, Rhys Holman and Daniel Allotta from Independent Locksmiths showing off their new Silca F800 Unocode machine.

LIGHTHOUSE LOCKSMITHS (WA)

George and Alex from Lighthouse Locksmiths are all smiles as we have a picture of them with their new Silca Futura Pro.

LION LOCK AND SECURITY (WA)

Daniel Martin from Lion Lock & Security is ROARING to go with the purchase of his new Futura Edge!

PROCARE LOCKSMITHS (WA)

Clayton Powell and Damien Harding adding the "PRO" touch to Procure Locksmiths taking ownership of their 3rd Smart Pro from Tony Paterson.

GADGET LOCKSMITHS (WA)

Steve Mason from Gadget Locksmiths located in Port Hedland is all smiles with the new purchase of the Silca F900. The team from Gadget service the Pilbara Region of WA and travel as far as the NT border servicing the remote communities there. The Silca F900 compliments their Futura Pro and a Bravo Professional within their workshop.

SORRENTO LOCKSMITHS (VIC)

Tom from Sorrento Locksmiths is happy to pose with his new upgrade to a Silca Futura Pro.

THE REKORD PRO S MACHINE

NEW FROM SILCA

Ideal for vans or medium volume shops, or when you just need a solid reliable duplicator as a backup or secondary machine. Compact, user friendly, safe and reliable: Rekord Pro S fits the bill.

The machine now includes the Quick Rotation clamp system, which will be familiar to users of the Futura family. Just loosen the clamp knob and rotate – no need to lift or pull – just twist and the clamp will lock into place. The four-sided clamps can hold just about any single or double sided flat inline residential or automotive key, including blades, flip keys, small padlock keys or cruciform keys.

Smooth and self-lubricating carriage bushes guarantee smooth and safe movements of the carriage, and the left-hand lever moves the carriage confidently and without play for safe operation. The HSS cutter is now TiAIN coated for a longer life, and the deburring brush is Tynex ensuring safety and quick removal of swarf without wearing or damaging the key.

Ample tool and key storage areas top and bottom keep the work area clean and accessories at hand. A microswitch activates the motor when the carriage is released, and switches it off when replaced improving operator safety. The Micrometric tracer point adjustment is easy, precise and stable – once set, lock it in and just cut keys without fuss
