ROBUST & SECURE

ABUS WCH90 + 9KS CHAIN

LOVE IT?
LOCK IT

PRECISION
GERMAN
ENGINEERING

Secure bikes, valuables & equipment with the ABUS WCH90 Wall Anchor

The ABUS WCH90 Wall Anchor is a high-security system designed for securing your bikes in your home's garage or outside the house. This robust and economical wall anchor neatly integrates chain and anchor in one system. With the specially hardened steel housing, the wall anchor is firmly anchored in the wall with high-security special dowels, offering an extremely high level of theft protection.

The chain and the housing are made of specially hardened steel, and the chains are available in different lengths. Additionally, the ABUS XPlus cylinder ensures the greatest protection against manipulation, such as picking. The WCH90 Wall Anchor and Chain is easy to handle, and a secure solution for your bikes. The anchor can be used to secure two-wheel vehicles in garages, cellars, and houses, and it's designed for wall mounting only.

Benefits

- Integrated chain and anchor system for easy handling
- Hardened steel housing and chain provide high resistance to attacks
- ABUS XPlus cylinder ensures maximum protection against manipulation
- Textile coating protects against paint damage
- Can be used to secure two-wheel vehicles in garages, cellars, and houses

Features

- Weight: 4.22 kg
- Type of lock: ABUS XPlus cylinder
- Chain diameter: 9 mm (chain)
- Number of keys: 2
- Mounting: Wall mounting only

LUCAS COX

ACCESS HARDWARE (QLD)

Please provide a short personal biography about yourself

I grew up in North Brisbane, I'm 30 years old and the Queensland Security Solutions Service Manager at Access Hardware. I completed my schooling here in Brisbane and graduated year 12 in 2010. From here I started my apprenticeship with Access Hardware and have slowly climbed the ranks to my current role. I'm in a great position in my career that I get to both lead a great team of Locksmiths as well as still get on the road and do work. Being a SCEC Locksmith this helps with being able to go and do work in places where many would never go. Outside of work I like camping and getting outdoors with my young family.

What are some of the skills and abilities necessary for someone to succeed as a locksmith?

There are a few skills and abilities necessary to be a successful locksmith, but one of the main ones is to be a good listener and learner. We also need to be creative and think outside the box to solve any problem that comes our way.

I believe communication is key; the ability to communicate with your clients, suppliers and colleagues is an important skill to develop. Being flexible is another important skill I believe is required, everyday doesn't always go to plan so we need to be flexible and adapt ourselves to achieve the best outcome for every situation.

Problem solving is a skill that is required for a Locksmith. Our jobs require us from getting "Point A" (Lock not on door, lock not opening) to "Point B" (Lock installed, lock opened). Getting between these points always has its challenges and being able to solve your way through it will help you get through the other side of the jobs easier.

What key issues do you think will affect the locksmith industry in the coming decade and how do you think these should be approached?

Over the last 12-13 years of being in the industry, I have found that the traditional Locksmithing still has its place, but it is starting to come to an end as we are replacing locks and hardware instead of repairing.

Traditional Locksmiths that aren't willing to adapt to the next chapter of our industry will struggle with the demand of the customers' needs. Customers are looking at how their problem can be fixed as quickly, efficiently and cost effective as possible.

With people wanting to live a more autonomous life we will see technology take over the security industry even more than it has now.

In the current climate within the industry, we're seeing a lack of skilled labour. I believe this is from companies not investing in apprentices. They're the future of our trade and without being able to train and pass on our skills and knowledge; we're going to slowly push our trade backwards.

Tell us why you should be Australia's best young locksmith.

Being my last year that I can apply for ABYL I've been able to have a good look at what I am doing as a locksmith and the route I've taken as a commercial locksmith has been the best thing I've done in the industry.

I've found over my time as a locksmith that the most tense and busy times bring out the best or worst in people and how we react as a team to support each other to move forward together to achieve greatness.

Having the opportunity to win the title of "Australia's Best Young Locksmith 2023" would provide a valuable stepping stone in the direction I want to travel with my career.

It will give me with the opportunity to have my name and Access Hardware's name out in the market and show that we can produce great young locksmiths and we're not just a hardware supply company but a force to be reckoned with.

Having this type of acknowledgement and reassurance that I'm on the right path would help me give young locksmiths in the industry a voice and show that we can make valuable contributions and we can bring the industry into the 21st century with our unique abilities and youthful eyes, without forgetting the Locksmithing history.

TIME SAVING SOLUTION FOR PROGRAMMING SLOT AND PROXIMITY KEYS TO VOLVO VEHICLES

The dongle connects to the vehicle OBD port and extracts the required security data freeing up SMART Pro for other jobs. The dongle stores the reading session meaning if interrupted it will commence from the previous finish point.

This means that the data could be read over a number of different sessions. The LEDs on the dongle will give a visual indication when the required data has been read. Thereafter keys can be programmed by connecting the dongle to the SMART Pro and following the programming process in the SMART Pro.

SMART CCTV MADE SIMPLE

In a world of heightened concern around surveillance, Milesight is the safe and simple choice for CCTV installation.

Milesight produce a great range of NDA A Compliant cameras and NVR's, which do not use or deploy critical components including SoCs (System on Chips) produced by NDA A banned component vendors. These are recommended for enterprises and critical applications where compliance is essential.

There are huge commercial advantages to installing Milesight, its high-quality range is available to qualified installers only and cannot be purchased online by the general public.

Furthermore, Milesight cameras' vandal-proof metal casing provides superior protection to many competing plastic-encased brands. Most standard Milesight Cameras also feature a full suite of AI features.

Installer's Choice

**MULTIPLE APPLICATIONS INCLUDING
BUSINESS & RESIDENTIAL**

AI Weather-Proof Mini Dome Camera

The AI Weather-Proof Mini Dome Camera is a CCTV installer's bread and butter. Coming in at a very affordable & highly profitable price point for the installer, this model has a huge variety of different uses, including small business, residential and more. This smart, weather and vandal-proof camera features a wide variety of AI features to satisfy your clients' needs.

Milesight

Narrow To Wide Optical Zoom

**ENTRANCES, HALLWAYS, DRIVEWAYS
& MORE**

AI Motorised Pro Bullet Camera

The AI Motorised Pro Bullet Camera has multiple lenses, allowing users to optically zoom in or out to their desired range, or focus in on something without pixelating the image. It's perfect for applications requiring a longer focal length, such as long-range narrow views, while still allowing the user to zoom out to a wider angle when required. Even in low light, this model still provides an excellent picture and allows smart AI features for analytics and identification.

Comprehensive Overhead View

**SHOPPING, COMMERCIAL TRACKING,
BUSINESS**

AI 360° Panoramic Fisheye

The AI 360° Panoramic Fisheye is ideal for commercial, retail or business settings. When used correctly, it alone can do the job of multiple cameras, providing a great option to save your business time and money. It takes a full 360° view of its surroundings, reconfiguring its initial fisheye input into a package of clear, unwarped video segments with zero blind spots. Clients will love this camera's ability to provide analytics for their business, offering features such as heat tracking, people counting and line crossing.

SLIDING SECURITY DOOR LOCKS

- Mortice deadlock for sliding security doors
- Unlatched by levers from either side
- Snib lockable from inside
- Key lockable from both sides

- Cylinder not included
- Interlocking pin resists the door from being lifted or forced
- Upgradable to triple lock
- Finishes in black, brown, primrose and white

A BETTER WAY TO CUT ABLOY PROTEC® KEYS

NEW

New from Silca – a better way to cut Abloy Protec® keys

Options for cutting Abloy Protec® keys with an electronic machine have been limited – until now. Silca have released the V6F clamp for Unocode F-Series machines that allows Abloy Protec® keys to be cut automatically and easily.

Using your Unocode F-Series machine with ProMaster8 and the new clamp will help streamline your key cutting operation, improving accuracy, reducing waste and making the process easier and more reliable.

LSC recommends a Unocode F100 machine with the V6F, and this provides the perfect dedicated cutting station for Abloy Protec® keys. You can also use the clamp with any Unocode F-Series machine.

SD7A7204ZB

Features:

- Automatically rotates the key
- Single knob system to secure the key
- Dedicated cutter to ensure cuts to tolerance
- Works with ProMaster8

Talk to LSC about removing headaches from your key cutting operation with the Silca Unocode F-Series machines today.

RisControl

Controller for Alarm & Smart Automation

AVAILABLE NOW

CHOOSE WISELY, LIVE SMARTLY!

Meet the new RisControl Controller from RISCO Group; the ultimate integrated solution that combines professional hybrid panel control with advanced smart home and video solutions.

This 8-inch intuitive touchscreen keypad is designed for use with the LightSYS Plus hybrid security system for alarm and surveillance control, as well as a wide range of Z-Wave smart home devices including light bulbs, door locks, thermostats, blinds and smart plugs.

Unlike other integrated Alarm and Z-Wave controllers on the market, the RisControl Z-Wave touchscreen can be used as a standalone product – making it the perfect solution for installers seeking to enter the smart home automation market.

NEWS AND EVENTS

STU CONTINUES HIS QLD TOUR!

Our Security Training Unit, STU, is currently traversing Queensland, and we've had a ball visiting regional customers who don't often get the chance to visit one of our branches.

We built STU to help Australian locksmiths & security experts, who aren't located near one of our branches, to get hands-on with some of the latest & best products on the market; such as the Silca Unocode F900, Silca Futura Pro, Futura Auto, Poker Pro, SMART Pro & the RW5.

We recently had the pleasure of visiting this group of Stage 1B apprentices from TAFE Queensland; thanks to everyone for coming! If you'd like a visit from STU, please enquire with your LSC Account Manager.

FIGHT AGAINST MSA

LSC TAKES ON THE MELBOURNE MARATHON FOR THE FIGHT AGAINST MSA

On Sunday, October 15th, we had our largest-ever group of participants at the Melbourne Marathon, with plenty of LSC staff & family members turning up to get active in support of a great cause! Over the past 4 months, LSC staff across Australia & New Zealand have been taking part in a huge fundraising effort, raising money & awareness for the fight against the horrible disease our late coworker Craig McLaughlin suffered from, MSA.

This fundraising effort included our ice bucket challenge grand tour of Australia & New Zealand, which recently concluded at our Distribution & Training Centre. Multiple System Atrophy (MSA) is a neurodegenerative disorder that affects the brain. Currently, there is no cure for MSA, no therapy to slow it down and very few treatments to manage its debilitating effects.

Through our partnership with Defeat MSA Australia & New Zealand, this epic fundraising journey has taken on a life of its own. Thank you kindly for all your contributions so far, they have paved the way for MSA research advancements and crucial assistance for those affected by the condition.

Donations are still open, please scan the QR code to head straight over to our Melbourne Marathon team page! If you'd like to check out our ice bucket challenge videos, please head over to our Facebook, Instagram or LinkedIn.
