

Marketing Release Note AUS & NZ

Wireless Panda Keypad for LightSYS Plus

RW432KPP402A

March 2024

RISCO is happy to announce the release of the new Wireless Panda keypad for LightSYS Plus, for ANZ market in 433MHz.

The new Wireless keypad for LightSYS+ offers additional capabilities and benefits to installers that outperform the previous wireless Panda for LightSYS 2:

Key messages:

- **Flexibility** – When installed with LightSYS Plus it allows a quick and easy all-wireless installation.
- **Ease of Use** – Programming functionality as a wired RISCO keypad, simulating a Bus connection.
- **Convenience** – Complete flexibility to place it where needed with no drilling and wiring.
- **Save time and money** – The keypad can be Upgraded automatically, without the hassle of on-site visits from engineers. Our remote upgrade capability ensures efficient and cost-effective processes.

Technical considerations

When installed with LightSYS Plus a Wireless Video Module should be used.

Compatibility

LightSYS Plus - FW version 3.0.1 or higher

LightSYS Plus - connection via WL video receiver P/N RP432EWW400A (433/916Mhz)

NB: Not supported with LightSYS2

NB: Not supported with WiComm Pro or Agility4
