

QuantumLock Power Saver Installation

Specifications:

1. **Working Voltage:** AC 180V – 250 V 50Hz
2. **Maximum Load Working Current:** 30A
3. **Maximum Load Power:** 6600W
4. **Static Consumption:** 0.8W
5. **Time Delay:** 12 seconds, adjustable by requirement
6. **Cover Material:** Anti-fire ABS
7. **Working Temperature:** - 10°C – 45 °C
8. **Working Humidity:** <= 90% RH

Installations Note:

1. This product must be installed by qualified electrician.
2. Please do not press the Circuit Board when fixing the unit.
3. Check below items before installation.
 - a) Voltage range (AC 180V – 250V).
 - b) Total power load (30A, 6600W)
3. Prohibited in heavy humidity condition.
